

Report on Open House and Fete – Department of Commerce

The **Department of Commerce** successfully organized an **Open House and Fete** to showcase the academic learning, practical skills, and innovative ideas of the students. The event aimed to provide visitors with an opportunity to understand important business concepts through interactive models and demonstrations prepared by the students.

The major highlights of the open house were the working models on **Stock Market** and **Supply Chain Management**, which attracted great interest from visitors, students, and faculty members & charts were also prepared on before & after GST, Financial derivatives, Management services etc.,

The **Stock Market model** demonstrated how the stock market functions in real life. Students explained the basic concepts of buying and selling shares, market fluctuations, demand and supply, and the role of investors and brokers. The model also illustrated how companies raise capital through the stock market and how investors earn profits through dividends and price changes. Through charts, mock trading boards, and examples, visitors were able to clearly understand how stock exchanges operate and how investment decisions are made.

The second model focused on **Supply Chain Management**, which explained the process through which goods move from manufacturers to consumers. The model illustrated the different stages of the supply chain including production, storage, transportation, distribution, and retail. Students demonstrated how effective supply chain management helps businesses reduce costs, improve efficiency, and deliver products to customers on time. Visual representations and practical examples helped visitors understand the importance of coordination between suppliers, manufacturers, warehouses, and retailers.

The fete section of the event added excitement and engagement to the open house. Various stalls were organized by students, offering food items, games, Scary house and fun activities. These stalls not only entertained the visitors but also helped students develop entrepreneurial and managerial skills such as planning, teamwork, marketing, and financial management.

The event witnessed enthusiastic participation from students, faculty members, and visitors from other departments. The models and presentations reflected the students' creativity, knowledge, and practical understanding of commerce concepts.

Overall, the **Open House and Fete organized by the Department of Commerce** was a great success. It provided a platform for students to demonstrate their learning in a practical manner while also encouraging interaction, creativity, and entrepreneurial thinking. The event proved to be both educational and enjoyable for everyone involved.
